- Across the University we have equal numbers of male and female students; however there are wide variations between faculties. These variations largely follow national trends.
- There has been a decrease in male student numbers over the three year period.
- The gender imbalance is greater for students from LPN postcodes with more of these students being female rather than male.
- The university received more applications from female applicants. But the male conversion rate is slightly higher than female.
- Male students are more likely to withdraw at the end of first year and are more likely to not make appropriate progress or graduate at the end of year three.
- There was no gender difference in overall satisfaction according to NSS results.
- Over the three year period, female students achieve more good honours however; the gender gap has reduced significantly.

## STUDENT POPULATION ANALYSIS

Table 1 Breakdown of students by gender

| Faculty | FEMALE |  |  | MALE |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{1 2 / 1 3}$ | $\mathbf{1 3 / 1 4}$ | $\mathbf{1 4 / 1 5}$ | $\mathbf{1 2 / 1 3}$ | $\mathbf{1 3 / 1 4}$ | $\mathbf{1 4 / 1 5}$ |
| Arts, Creative <br> Industries and <br> Education | 2647 | 2381 | 2204 | 1279 | 1211 | 1101 |
| Business and <br> Law | 1466 | 1532 | 1563 | 2277 | 2294 | 2208 |
| Environment <br> and <br> Technology | 741 | 749 | 761 | 3365 | 3389 | 3255 |
| Health and <br> Applied <br> Sciences | 3697 | 3752 | 3735 | 1613 | 1598 | 1466 |
| University <br> total | $\mathbf{8 5 5 1}$ | $\mathbf{8 4 1 4}$ | $\mathbf{8 2 6 3}$ | $\mathbf{8 5 3 4}$ | $\mathbf{8 4 9 2}$ | $\mathbf{8 0 3 0}$ |

Table 1 shows that across the university we have equal numbers of male and female students, however there are wide variations between faculties. Ace and HAS have more female students than male; in comparison, FBL and FET have more male students than female. Considering the proportion of students by gender appears to show the faculties (except HAS) have become more balanced over the 3 year period but this is largely due to a fall in student numbers rather than an actual rebalancing. The only exception is FET where the proportion of female to male students has gone from $18 \%$ female to $19 \%$ female between $12 / 13$ and $14 / 15$ and where both female and male student numbers has increased.

National Comparison: In comparison to the rest of the sector, HESA data collected in 2013/14 showed there were a higher proportion of female students in higher education across all modes of study ${ }^{1}$. For first year, full time undergraduates, $54.7 \%$ were female. This slight difference in proportion continued into 2014/15.

[^0]

Figure 1Breakdown of student numbers by faculty and year of study for gender
Figure 1 shows that the gender breakdown for a faculty is largely consistent across years of study. The exceptions are FET's Year 0 programmes that are almost exclusively male. Equally, FET's year 3 gender balance is much greater than year 1 and 2 which echoes the changes in numbers shown above, over the 3 year period.

Table 2 breakdown of student numbers over 3 years by gender for departments within faculties

| Faculty | Department | FEMALE |  |  | MALE |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 12/13 | 13/14 | 14/15 | 12/13 | 13/14 | 14/15 |
| Arts, Creative Industries and Education | Art and Design | 702 | 653 | 609 | 321 | 311 | 290 |
|  | Arts and Cultural Industries | 664 | 521 | 460 | 508 | 422 | 344 |
|  | Education | 777 | 711 | 624 | 107 | 91 | 83 |
|  | Film and Journalism | 504 | 496 | 511 | 343 | 387 | 384 |
| Business and Law | Accounting, Economics and Finance | 220 | 230 | 214 | 718 | 760 | 733 |
|  | Business and Management | 699 | 748 | 829 | 1215 | 1198 | 1193 |
|  | Law | 547 | 554 | 520 | 344 | 336 | 282 |
| Environment and Technology | Architecture and the Built Environment | 235 | 250 | 254 | 898 | 867 | 783 |
|  | Computer Science and Creative Technologies | 120 | 122 | 127 | 1082 | 1080 | 1028 |
|  | Engineering, Design and Mathematics | 129 | 131 | 122 | 800 | 884 | 928 |
|  | Geography and Environmental | 257 | 246 | 258 | 585 | 558 | 516 |

|  | Management |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Health and <br> Applied <br> Sciences | Allied Health <br> Professions | 469 | 486 | 489 | 239 | 226 | 236 |
|  | Biological, <br> Biomedical <br> and Analytical <br> Sciences | 570 | 598 | 509 | 570 | 639 | 559 |
|  | Health and <br> Social Sciences | 1272 | 1180 | 1113 | 660 | 561 | 483 |
|  | Nursing and <br> Midwifery | 1386 | 1488 | 1624 | 144 | 172 | 188 |

Table 2 shows a variation of patterns of changes in student numbers by gender across departments.
In ACE, for all departments except Film and Journalism, there has been an equal decrease in male and female student numbers over the 3 year period. In Film and Journalism there has been a greater increase in male numbers than in female numbers over this period. Across ACE approximately $1 / 3$ of students are male, with more female students in Education and Art and Design, in particular.

In FBL, there has been a considerable growth in female students in Business and Management while there has been a drop in male student numbers. Conversely, there has been a slight decrease in female numbers in Law, whereas there has been a significant decrease in male student numbers. Accounting, Economics and Finance continues to see a significant gender imbalance (with far more male students) but the numbers are remaining static over the 3 year period. In FBL, there is the most even gender balance across the university ( $41 \%$ of students are female) however, this ranges from $64 \%$ in Law to $23 \%$ in Accounting).

In FET, all departments except EDM have seen slight increases in female student numbers accompanied by small decreases in male student numbers. Overall, in FET, $18 \%$ of students are female, with departmental proportions ranging from 33\% in Geography to $11 \%$ in Computer Science.

In HAS, there has been a slight increase in male student numbers in Nursing and Midwifery over the 3 years but all other departments have either maintained their unequal gender ratio or it has worsened. Only $28 \%$ of students in HAS overall are male, and this worsens to $90 \%$ in Nursing \& Midwifery and $70 \%$ in Health and Social sciences.

National comparison: These reported gender patterns in subject areas can be found within the Equality Challenge Unit's statistical report 2015; two of the most notable imbalances were: 79.7\% first degree undergraduates studying subjects allied to medicine were women and $14.4 \%$ first degree undergraduates studying engineering and technology were women. ${ }^{2}$

## CHANGES IN THE GENDER BREAKDOWN OF THE STUDENT BODY OVER TIME

[^1]

Figure 2change in student numbers over time by gender
The graph above shows the significant decrease in male student numbers over the 3 year period and the much less steep decrease in female numbers across the same period.

UNDERSTANDING GENDER WITH OTHER PROTECTED CHARACTERISTICS

## AGE AND GENDER

Table 3 breakdown of student numbers by age and gender

| Gender | 21 and above | Under 21 | 21 and above | Under 21 |
| :--- | :--- | :--- | :--- | :--- |
| FEMALE | 7114 | 20450 | $60.60 \%$ | $48.93 \%$ |
| MALE | 4797 | 21667 | $39.40 \%$ | $51.07 \%$ |

Table 3 shows that the gender imbalance is greater for mature students than young students, with parity almost being achieved in the young student population.

Table 4 breakdown of students by faculty summarised by age and gender

|  |  | 21 and above | Under 21 | 21 and above | Under 21 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Arts, Creative Industries and Education | Female | 1218 | 6014 | 64.01\% | 67.76\% |
|  | Male | 702 | 2889 | 35.99\% | 32.24\% |
| Business and Law | Female | 376 | 4185 | 41.36\% | 40.92\% |
|  | Male | 572 | 6207 | 58.64\% | 59.08\% |
| Environment and Technology | Female | 373 | 1878 | 16.88\% | 17.89\% |
|  | Male | 1846 | 8163 | 83.12\% | 82.11\% |
| Health and | Female | 4819 | 6365 | 77.78\% | 65.94\% |

| Applied Sciences | Male | 1383 | 3294 | $22.22 \%$ | $34.06 \%$ |
| :--- | :--- | :--- | :--- | :--- | :--- |

Table 4 shows that the traditional gender patterns (with more female students in HAS and more male students in FET) is further pronounced with mature students in comparison to young students. The gender breakdown is largely the same in FBL and ACE for mature and young students.

## DISABILITY AND GENDER

Table 5 breakdown of student numbers by disability and gender

| Gender | Disabled | Not disabled | Disabled | Not disabled | Disabled <br> and DSA |
| :--- | :--- | :--- | :--- | :--- | :--- |
| FEMALE | 4058 | 23506 | $52.96 \%$ | $51.33 \%$ | $10.72 \%$ |
| MALE | 3715 | 22749 | $47.04 \%$ | $48.67 \%$ | $9.80 \%$ |

Table 5 shows that there is no greater gender imbalance for disabled students in comparison to nondisabled students - both groups are slightly more likely to be female. Female students with a disability are also slightly more likely to be in receipt of DSA than male students.

Table 6 breakdown of students by faculty summarised by age and gender

|  |  | Disabled | Not <br> disabled | Disabled | Not <br> disabled | Disabled <br> and DSA |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Arts, Creative <br> Industries and <br> Education | Female | 373 | 1788 | $17.26 \%$ | $82.74 \%$ | $12.08 \%$ |
|  | Male | 179 | 899 | $16.60 \%$ | $83.40 \%$ | $11.83 \%$ |
| Business and <br> Law | Female | 187 | 1242 | $13.09 \%$ | $86.91 \%$ | $8.87 \%$ |
|  | Male | 216 | 1749 | $10.99 \%$ | $89.01 \%$ | $7.11 \%$ |
| Environment <br> and <br> Technology | Female | 117 | 577 | $16.86 \%$ | $83.14 \%$ | $11.82 \%$ |
|  | Male | 453 | 2634 | $14.67 \%$ | $85.33 \%$ | $10.07 \%$ |
| Health and <br> Applied <br> Sciences | Female | 559 | 3106 | $15.25 \%$ | $84.75 \%$ | $11.36 \%$ |
|  | Male | 232 | 1210 | $16.11 \%$ | $83.89 \%$ | $12.08 \%$ |

Table 6 shows that in all faculties, disabled students are more likely to be female than male. Further, in all faculties except for HAS, female disabled students are more likely to be in receipt of DSA.

## ETHNICITY AND GENDER

Table 7 breakdown of student numbers by ethnicity and gender

| Broad <br> category |  | Female | Male | Female | Male |
| :--- | :--- | :--- | :--- | :--- | :--- |
| BME |  | $\mathbf{3 6 1 6}$ | $\mathbf{3 9 4 2}$ | $\mathbf{1 2 . 9 0 \%}$ | $\mathbf{1 4 . 7 3 \%}$ |
|  | Asian | 1004 | 1221 | $3.58 \%$ | $4.62 \%$ |

|  | Black | 1310 | 1364 | $4.67 \%$ | $4.98 \%$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | Chinese | 146 | 224 | $0.52 \%$ | $0.84 \%$ |
|  | Mixed | 997 | 964 | $3.56 \%$ | $3.64 \%$ |
|  | Other | 159 | 169 | $0.56 \%$ | $0.65 \%$ |
| White | White | $\mathbf{2 3 8 5 0}$ | $\mathbf{2 2 3 8 6}$ | $\mathbf{8 6 . 7 4 \%}$ | $\mathbf{8 4 . 7 5 \%}$ |
| Not Known | Not Known | 98 | 136 | $0.37 \%$ | $0.51 \%$ |

Table 8 breakdown of students by faculty summarised by age and ethnicity

|  |  | Female | Male | Female | Male |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Arts, Creative Industries and Education | BME | 636 | 297 | 8.76\% | 8.31\% |
|  | White | 6568 | 3278 | 90.84\% | 91.23\% |
|  | Unknown | 28 | 16 | 0.40\% | 0.47\% |
| Business and Law | BME | 955 | 1294 | 20.54\% | 18.95\% |
|  | White | 3595 | 5460 | 79.20\% | 80.65\% |
|  | Unknown | 11 | 25 | 0.26\% | 0.40\% |
| Environment and Technology | BME | 428 | 1509 | 18.77\% | 14.90\% |
|  | White | 1821 | 8451 | 81.13\% | 84.66\% |
|  | Unknown | 2 | 49 | 0.10\% | 0.44\% |
| Health and Applied Sciences | BME | 1515 | 700 | 13.52\% | 15.06\% |
|  | White | 9649 | 3952 | 86.31\% | 84.39\% |
|  | Unknown | 20 | 25 | 0.18\% | 0.55\% |

Across the University, there is a greater proportion of BME students in the male student population than the female student population. This is particularly true in FET where there is a 4 pp difference between the female and male proportion of BME students.

## GENDER AND LPN

Table 9 breakdown of students by gender and LPN

| Gender | LPN | Not LPN | LPN | Not LPN |
| :--- | :--- | :--- | :--- | :--- |
| FEMALE | 918 | 5524 | $53.87 \%$ | $49.02 \%$ |
| MALE | 786 | 5745 | $46.13 \%$ | $50.98 \%$ |

Table 9 shows that the gender imbalance is greater for students from LPN postcodes with more of these students being female rather than male.

Table 10 breakdown of students by faculty summarised by gender and LPN

|  |  | LPN | Not LPN | LPN | Not LPN |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Arts, Creative Industries and Education | Female | 276 | 1546 | 17.49\% | 14.96\% |
|  | Male | 104 | 768 | 6.56\% | 7.43\% |
| Business and Law | Female | 178 | 1127 | 11.31\% | 10.91\% |
|  | Male | 179 | 1627 | 11.34\% | 15.74\% |
| Environment and Technology | Female | 81 | 495 | 5.13\% | 4.79\% |
|  | Male | 333 | 2196 | 21.10\% | 21.25\% |
| Health and | Female | 302 | 1736 | 19.11\% | 16.79\% |

| Applied Sciences | Male | 126 | 841 | $7.96 \%$ | $8.13 \%$ |
| :--- | :--- | :--- | :--- | :--- | :--- |

Table 10 shows that in FET there are significantly more female students from LPN postcodes than male students from LPN postcodes. There is a similar pattern in FET and HAS but the proportion of male and female students from LPN postcodes is largely the same in FBL.

> STUDENT METRICS ANALYSIS - 2014/15 DATA

## APPLICATION DATA

Table 11 breakdown of applications in 14/15 by gender for faculties and departments

|  |  | Female | Male | Female \% | Male \% |
| :---: | :---: | :---: | :---: | :---: | :---: |
| University |  | 16,118 | 12,226 | 57\% | 43\% |
| ACE | Faculty total | 4,363 | 2,162 | 67\% | 33\% |
|  | Art and Design | 1,264 | 597 | 68\% | 32\% |
|  | Arts and Cultural Industries | 820 | 553 | 60\% | 40\% |
|  | Education | 1,220 | 215 | 85\% | 15\% |
|  | Film and Journalism | 1,059 | 797 | 57\% | 43\% |
| FBL | Faculty total | 2,096 | 2,473 | 46\% | 54\% |
|  | Accounting, Economics and Finance | 224 | 576 | 28\% | 72\% |
|  | Business and Management | 1,253 | 1,564 | 44\% | 56\% |
|  | Law | 619 | 333 | 65\% | 35\% |
| FET | Faculty total | 1,127 | 4,488 | 20\% | 80\% |
|  | Architecture and the built environment | 401 | 1,055 | 28\% | 72\% |
|  | Computer Science and Creative Technologies | 187 | 1,528 | 11\% | 89\% |
|  | Engineering, Design and Mathematics | 201 | 1,332 | 13\% | 87\% |
|  | Geography and Environmental Management | 338 | 573 | 37\% | 63\% |
| HAS | Faculty total | 8,081 | 2,846 | 74\% | 26\% |
|  | Allied Health Professions | 1,551 | 1,078 | 59\% | 41\% |
|  | Biological, Biomedical and Analytical Sciences | 792 | 699 | 53\% | 47\% |
|  | Health and Social Sciences | 1,779 | 676 | 72\% | 28\% |
|  | Nursing and Midwifery | 3,959 | 393 | 91\% | 9\% |

Table 11 shows that the university receives more applications from female applicants. This pattern is fairly consistent across the university, except in FBL and FET. In FBL, there is greater variation with the faculty achieving an overall gender balance in applications (disguising wide variations by department and subject area). Accounting, Economics and Finance attract far greater numbers of male applications, whereas Law, attracts more female applications. In FET, there is generally more applications from male applicants, particularly in Computer Science and Creative Technology, and Engineering Design and Mathematics.

Table 12 Student enrolments in 2014/15 and conversion rate by gender

|  |  |  |  |  |
| :--- | :--- | :--- | ---: | ---: | ---: | ---: | ---: | ---: |

Table 12 shows that overall the male conversion rate is slightly higher than the female conversion rate but that the university enrols slightly fewer male than female first year students. There are clearly differences across subject areas with some areas being heavily female (all ACE departments, all HAS departments and Law) and others being heavily male (all FET subjects and the rest of FBL, excluding Law). This pattern is similar in applications too but conversion rates vary, suggesting some attempts are being made to rebalance this pattern. While conversion rates follow the gendered patterns in ACE (with a stronger conversion rate for women in all departments), two male dominated departments in FBL (Accounting and Business) have stronger conversion rates for female students. Also, FET has typically stronger female conversion rates (except for Engineering, which has a much lower female conversion rate). In HAS, there is a mixed picture, with all departments except Allied Health Professions having a stronger conversion rate for male students.

Looking more closely at these traditionally female and traditionally male areas we can see that $60 \%$ of female enrolments are into areas where there is a higher application rate for women, and equally $60 \%$ of male enrolments are into areas with higher male application rates. There is a higher conversion rate for men into areas with more male applications (25\%) than for women into female dominated areas for applications (19\%). There is also a higher conversion rate for women into non-traditional areas where we receive fewer female applications (25\%). However, we do not see the converse - in areas where we
receive fewer male applications (such as HAS and Law) we see a lower conversion rate for male than into the more traditional male areas (FET and Business) - $19 \%$ vs $25 \%$.

## PROGRESSION

Table 13 Breakdown of progression by gender

| Transition point | Age group | Total \# | No HE | No Progression | Progression | Qualified | No HE \% | No Progression | Progression \% | Qualified \% |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{aligned} & \text { Year 1-2 } \\ & (2010 \text { to } \\ & 2011) \\ & \hline \end{aligned}$ | Female | 2581 | 285 | 96 | 2199 | 1 | 11.04\% | 3.72\% | 85.20\% | 0.04\% |
|  | Male | 1975 | 276 | 139 | 1560 |  | 13.97\% | 7.04\% | 78.99\% | 0.00\% |
| $\begin{aligned} & \text { Year } 2 \text { - } 3 \\ & (2011 \text { to } \\ & 2012) \end{aligned}$ | Female | 2296 | 118 | 76 | 2098 | 4 | 5.14\% | 3.31\% | 91.38\% | 0.17\% |
|  | Male | 1700 | 136 | 105 | 1459 |  | 8.00\% | 6.18\% | 85.82\% | 0.00\% |
| $\begin{aligned} & \text { Year 3-4 } \\ & (2012 \text { to } \\ & 2013) \\ & \hline \end{aligned}$ | Female | 2182 | 78 | 105 | 110 | 1889 | 3.57\% | 4.81\% | 5.04\% | 86.57\% |
|  | Male | 1574 | 115 | 158 | 122 | 1179 | 7.31\% | 10.04\% | 7.75\% | 74.90\% |
| Year 4-5 (2013 to 2014) | Female | 240 | 37 | 30 | 24 | 149 | 15.42\% | 12.50\% | 10.00\% | 62.08\% |
|  | Male | 295 | 58 | 32 | 20 | 185 | 19.66\% | 10.85\% | 6.78\% | 62.71\% |

Table 13 shows that male students are more likely to withdraw at the end of first year and are more likely to not make appropriate progression the next year of study in each year. They are also less likely to graduate at the end of year 3

Table 14 NSS Satisfaction rates for $14 / 15$ broken down by gender

|  | Number of <br> respondents | Response <br> rate | The teaching <br> on my course | Assessment <br> and feedback | Academic <br> support | Organisation <br> and <br> management | Learning <br> resources | Personal <br> development | Overall <br> Satisfaction | Students Union <br> Female |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1984 | $79 \%$ | 87 | 71 | 82 | 73 | 88 | 83 | $\mathbf{8 5}$ | 68 |  |
| Male | 1513 | $71 \%$ | 87 | 70 | 83 | 77 | 87 | 83 | $\mathbf{8 5}$ | 69 |

Table 14 shows that there was no gender difference in overall satisfaction, despite some differences on key aspects of student life. Female students were more likely to respond to the survey.

In particular, male students were less satisfied with learning resources (giving slightly lower scores to the library and their ability to access the specialist resources they require). On the other hand, female students were less satisfied with organisation and management - expressing particular dissatisfaction with the way that changes are communicated.

GOOD HONOURS AND DEGREE CLASSIFICATION
Table 15 good honours rates for the university by gender over time

|  | $\mathbf{1 2 / 1 3}$ |  |  | 13/14 | $\mathbf{1 4 / 1 5}$ |  |

Table 15 shows that over the 3 year period, female students achieve more good honours than male students. However, the male student good honours rate has increased considerably in this period and the gender gap is now only 5 pp (down from 9 pp in 2012/13).

Table 16 shows that this is likely to be due to:

- Male students increasingly achieving $1^{\text {st }}$ (up by $2 p p$ over the 3 year period)
- A decrease in the proportion of female students achieving 2.1s (U2) in this period by 4 pp
- A decrease (by 3pp) in the proportion of male students achieving a 2.2 (L2) while the corresponding rate for female students stayed more or less static (a decrease of 0.61 pp )
- A slowly increasing rate of female students achieving a $3^{\text {rd }}$ and a slowly decreasing rate of male students achieving a $3^{\text {rd }}$

National Comparison: HESA data shows that across the sector, female students are generally achieving on par with male students, or in the case of upper second degree classifications, excelling their male counterparts. Furthermore, more male students than female are achieving a lower second or third/pass classification.

The Chart below shows the percentage distribution of first degree qualifiers in the UK obtaining each classification by sex and mode of study for 2014/15.

Figure 3. HESA 2014/15 data comparing degree classification rates by gender
Table 17. Good honours rate by gender for faculties

|  |  | 12/13 |  | 13/14 |  | 14/15 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Row Labels | Enrols | Good Honours Rate | Enrols | Good Honours Rate | Enrols | Good Honours Rate |
| ACE | Female | 817 | 83.60\% | 829 | 82.27\% | 653 | 80.08\% |
|  | Male | 361 | 77.31\% | 352 | 75.38\% | 292 | 76.88\% |
| FBL | Female | 341 | 73.34\% | 394 | 80.71\% | 378 | 85.62\% |
|  | Male | 441 | 65.96\% | 573 | 70.35\% | 502 | 76.55\% |
| FET | Female | 154 | 75.97\% | 152 | 76.32\% | 125 | 84.00\% |
|  | Male | 664 | 70.01\% | 686 | 75.80\% | 539 | 74.95\% |
| HAS | Female | 918 | 78.75\% | 1107 | 78.14\% | 918 | 75.85\% |
|  | Male | 360 | 70.62\% | 465 | 70.23\% | 338 | 67.82\% |

Table 17 shows the variation in good honours rates by faculty over the period. It shows that the biggest gender differences are in FBL, FET and HAS where there are almost 9pp differences between female and male good honours rates in 2014/15. In ACE, the differential is 3pp and it has decreased steadily across the 3 year period. In FBL, the gap is widening: in 2012/13 the gap was 7 pp and is now 9pp. In FET, the differential is variable year to year - it was 7 pp in 2012/13, decreased to 1 pp in 2013/14 and increased again to 9 pp in 2014/15. In HAS, the gap has remained around 8pp across the 3 years.

Table 18 breakdown of degree classifications in 2014/15 by faculty and gender

|  |  | 1st |  | U2 |  | L2 |  | 3rd |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Target Outcome Faculty Name |  | \# | \% | \# | \% | \# | \% | \# | \% |
| Arts, Creative Industries and Education | Female | 153 | 22.85\% | 370 | 57.57\% | 113 | 17.06\% | 17 | 2.52\% |
|  | Male | 53 | 17.55\% | 172 | 59.60\% | 60 | 20.20\% | 8 | 2.65\% |
| Business and Law | Female | 113 | 29.88\% | 211 | 55.31\% | 50 | 13.83\% | 4 | 0.99\% |
|  | Male | 112 | 22.84\% | 272 | 52.70\% | 105 | 21.76\% | 13 | 2.70\% |
| Environment and Technology | Female | 38 | 30.47\% | 67 | 53.13\% | 19 | 15.63\% | 1 | 0.78\% |
|  | Male | 164 | 29.95\% | 240 | 44.56\% | 127 | 23.89\% | 8 | 1.60\% |
| Health and Applied Sciences | Female | 239 | 25.83\% | 457 | 50.16\% | 187 | 20.24\% | 35 | 3.77\% |
|  | Male | 48 | 13.83\% | 181 | 54.47\% | 96 | 27.95\% | 13 | 3.75\% |

Table 18 provides further evidence of differentials in degree outcome by gender.

- In ACE, female students were more likely to achieve a first but were slightly less likely to receive a 2.1 (U2). Male students were more likely to receive a 2.2.
- In FBL, the greatest difference can be seen in the proportion of 2.2 (L2) and $3^{\text {rds }}$ with male students almost 8 pp more likely to get a 2.2 and nearly 2 pp more likely to get a $3^{\text {rd }}$ than a female student.
- In FET, female and male students achieved a $1^{\text {st }}$ at almost comparable rates, but male students were almost 10 pp less likely to achieve a 2.1 (U2) than a female student and almost $1 / 4$ of male students achieved a 2.2. (L2).
- In HAS, $1 \frac{1}{4}$ of all female students achieved a $1^{\text {st }}$ ( 12 pp more than male students). Male students were slightly more likely to achieve a 2.2 (U2) than female students but almost $1 / 3$ (28\%) achieved a 2.2 (L2).

Table 19 graduate destinations broken down by gender

| Gender |  <br> Study | Work + Work \& Study <br> (Prof) | Prof <br> $\mathbf{\%}$ | KPI <br> $\mathbf{\%}$ | U/E <br> $\mathbf{\%}$ | Study <br> $\mathbf{\%}$ | R.R.\% |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Female | $\mathbf{1 7 5 9}$ | $\mathbf{1 2 5 4}$ | $72.3 \%$ | $73.2 \%$ | $3.3 \%$ | $10.9 \%$ | $84.6 \%$ |
| Male | $\mathbf{1 3 5 2}$ | $\mathbf{9 7 2}$ | $72.6 \%$ | $70.2 \%$ | $7.1 \%$ | $11.8 \%$ | $86.5 \%$ |

Prof = professional/ graduate level work and constitutes a 'good' outcome,
KPI = our institutional KPI
$\mathrm{U} / \mathrm{E}=$ unemployed
R.R. response rate

Table 19 shows that there was no gender difference between the rates of professional employment. Male students had a higher unemployment rate than female students and a slightly higher study rate.
