

UWE Estates Design Guide 2022

EITHER

OR

Ref	Item	Confirmation of Compliance to Design Guide Section	Detail Derogation reference and outcome
Chapter 1: Introduction			
1.1	Change Control		
1.2	Introduction to UWE		
1.3	Introduction to the Design Guide		
1.3.1	Structure of the Design Guide		
1.4	Design Guide Compliance Checklist and Derogations		
1.5	General Design Principles		
Chapter 2: Design Governance			
2.1	Change Control		
2.2	Consulting to create a usable design		
2.3	Aesthetic and visual impact		
2.4	Designing an Experience		
2.4.1	New Pedagogical Approaches		
2.4.2	Laboratory / Workshop Design		
2.4.3	Student Accommodation		
2.5	Project Governance		
2.5.1	Project Management		
2.5.2	Standards governing design work		
2.5.3	Construction (Design & Management) Regulations 2015 (CDM)		
2.5.4	Management of occupied buildings including sequential handover		
2.5.5	Departures from Standards and Specifications		
2.5.6	Technical Assurance		
2.5.7	Named, Specialist Contractors		
2.6	Designing for Facilities Management & Maintenance		
2.6.1	Design features to improve access for plant/technical areas		
2.6.2	Lessons Learned		
2.6.3	Facilities for cleaning		
2.6.4	Facilities for waste disposal		
2.7	Designing for Business Continuity		
2.8	Designing for Net-Zero and Circular Economy		
2.9	Designing for Climate Resilience		
2.1	Overview of Asset Management at UWE		
2.11	Cost-in-use		
2.11.1	Cost-in-use evaluations on major capital projects		
2.11.2	Evaluations on minor capital projects (under £2.5m exc. VAT)		
2.11.3	Standards		
2.12	Soft Landings		
2.12.1	Information required at handover		
2.13	Post Occupancy Evaluation (POE)		
2.14	BIM, Asset Capture, Drawing Standards and the Common Data Environment		
2.15	Temporary Works Design		
2.15.1	Temporary Road/Footpath/Car Parks (and managing Closures/Diversions)		
2.15.2	Disturbance of soft-landscaping		
Chapter 3: UWE Strategies			
3.1	Change Control		
3.2	Master Plan and 'Adjacencies'		
3.3	Accessible and inclusive design		
3.3.1	Inclusive Design Features		
3.3.2	General advice for designers		
3.3.3	Applying the UWE Principles during the RIBA Plan of Work		
3.4	Strategy for Welfare Facilities		
3.4.1	General design considerations		
3.4.2	Creating inclusive and accessible facilities		
3.5	Security Systems Strategy		
3.5.1	A balanced approach		
3.5.2	Impact of Security on Fire evacuation		
3.6	Strategy 2030		
3.7	Designing a Sustainable University		
3.7.1	Sustainable Design Stages		
3.7.2	Sustainability - Actions to be taken by the design team		
3.7.3	Other considerations informing product selection		
3.7.4	Funding Opportunities for Sustainability Measures		

3.8	Design for Wellbeing		
3.8.1	Multi-function, wellbeing spaces		
3.9	Religion and Belief		
3.1	Fire Strategy		
3.10.1	Fire Safety Standards		
3.10.2	Information requirements		
3.10.3	Fire Safety Engineer		
3.10.4	Consultation with UWE Health and Safety Team		
3.10.5	Design responsibilities for fire safety during construction		
3.10.6	Third Party Accreditation		
3.10.7	Fire Stopping		
3.11	Printer Allocation Policy		
3.11.1	Printer Location Assessment		
3.12	UWE Sport Vision		
3.12.1	How the Estate supports the UWE Sports Vision		
3.13	UWE Transport Strategy		
3.14	Signage and Wayfinding Strategy		
3.14.1	Physical Signage		
3.14.2	Electronic signage		
3.14.3	Wayfinding Apps and mapping tools		
3.14.4	An inclusive and accessible Wayfinding Strategy		
3.15	Occupancy Hours		
	Chapter 4: Space Standards		
4.1	Change Control		
4.2	Functional Requirements in all Buildings		
4.3	Space Types		
4.4	Technology Requirements		
4.5	Space Standards		
4.5.1	Space Allocation		
4.5.2	Notes on calculating space requirements		
4.6	Room numbering		
	Chapter 5: Fabric and Structural		
5.1	Change Control		
5.2	Introduction		
5.3	Furniture and furnishings		
5.4	Accessibility of Student Accommodation		
5.5	Structural details		
5.5.1	Structural engineering		
5.5.2	Imposed Loads and Performance		
5.5.3	Foundations		
5.5.4	Structural Form		
5.5.5	Timber Frame		
5.6	Circulation Principles		
5.6.1	Building Entrances		
5.6.2	Reception		
5.6.3	Steps and stairs		
5.6.4	Horizontal circulation		
5.6.5	Vertical circulation		
5.7	Sustainable Material Selection		
5.8	Building fabric and envelope		
5.8.1	External Envelope		
5.8.2	Roof (including rooflights)		
5.8.3	Roof lights		
5.8.4	Windows		
5.8.5	External Doors		
5.8.6	External Finishes		
5.8.7	Rainwater Goods		
5.9	Internal Finishes		
5.9.1	General Provision		
5.9.2	Internal Walls & Doors		
5.9.3	Plasterboard		
5.9.4	Tiles		
5.9.5	Suspended Ceilings		
5.9.6	Flooring		
5.9.7	Painting		
5.9.8	Vision Access/visual contrasts		
5.9.9	Acoustics		
5.9.10	Fixtures and Fittings		
5.1	Provision for storage, deliveries and movement of materials		
5.11	Catering design		
5.11.1	Production Kitchens		

5.11.2	Deli/Café/Bar Style Operation		
5.11.3	Vending Operation		
5.11.4	Tea Points		
Chapter 6: Mechanical Services			
6.1	Change Control		
6	General Mechanical Design Principles		
6.2	Management of Mechanical Design		
6.2.1	Initial Survey and review of existing asset information		
6.2.2	Design Co-ordination		
6.2.3	Initial Load Assessment		
6.2.4	Plant, System Selection and Location		
6.2.5	Statutory Guidance and Practice Recommendations		
6.3	Schedule of Statutory Notifiable Plant:		
6.4	Commissioning: Mechanical		
6.5	General Principles Governing the HVAC strategy		
6.6	Pumped Water and Air Circuits		
6.7	Acoustics		
6.8	Metering		
6.9	Disposal Systems		
6.1	Laboratory/Industrial Waste Drainage		
6.11	Pumping of Drainage		
6.12	Piped Supply Systems		
6.13	Heating Pipework		
6.14	Hot & Cold Water Services		
6.14.1	General		
6.14.2	Hot Water Service		
6.14.3	Sustainable designs		
6.15	Natural Gas		
6.16	Medical/laboratory gas		
6.17	Refrigerant Pipework		
6.18	Mechanical Heating/Cooling/ Refrigeration Systems		
6.18.1	General Temperature Performance Requirements		
6.18.2	Heating		
6.18.3	Cooling		
6.19	Ventilation/Air Conditioning Systems		
6.19.1	Mechanical Ventilation		
6.19.2	Fire Strategy		
6.2	Approved Mechanical Suppliers		
Chapter 7: Electrical Services			
7.1	Change Control		
7.2	Management of Electrical Design		
7.2.1	Initial Survey		
7.2.2	Design Co-ordination		
7.2.3	Initial Load Assessment		
7.2.4	Plant, System Selection and Location		
7.2.5	Electrical Design Standards		
7.2.6	Stage Gate Approvals (RIBA Stages 2-6)		
7.3	Electrical Systems		
7.3.1	Utilities		
7.3.2	HV Switchgear and Transformers		
7.3.3	LV Modular Switchboards		
7.3.4	LV Panel Boards		
7.3.5	LV Distribution Boards		
7.3.6	Arc Fault Detection Devices (AFDD)		
7.3.7	Labelling System		
7.3.8	Metering		
7.3.9	Commissioning and Documentation		
7.3.10	Transient over Voltage Protection (SPD)		
7.3.11	Power Factor Correction		
7.3.12	Harmonic Filters		
7.3.11	Power Quality		
7.3.13	Under Floor Bus-Bar System		
7.3.14	Dado Trunking System		
7.3.15	Special Small Power Areas		
7.3.16	Electrical Supplies to Mechanical Plant		
7.3.17	UPS Systems		
7.3.18	Generator Systems		
7.3.19	Lighting		
7.3.20	Lighting Control		
7.3.21	Lighting Control by Area Type		

7.3.22	Emergency Lighting		
7.3.23	Commissioning and Handover		
7.3.24	External Lighting		
7.4	Fire Alarm System		
7.4.1	General requirements for the Fire Alarm System		
7.4.2	System Description		
7.4.3	Fire Alarm System / Mechanical Systems Interface		
7.4.4	Fire Alarm System / Access Control Systems Interface		
7.4.5	High risk areas		
7.4.6	Fire Alarm System / General Passenger Lifts Interface		
7.5	Containment and Wiring		
7.5.1	Individual Wiring Methodology		
7.5.2	Individual Containment Methodology		
7.6	Ancillary Services		
7.6.1	Lightning Protection System and Surge Protection		
7.6.2	Assistance Call Systems		
7.6.3	Wall Clocks		
7.6.4	Electrical hand and hair dryers		
7.6.5	Hearing Assistance Systems		
7.6.6	Lifts		
7.6.7	CCTV, Security Alarm, Access Control, Doors and Car Park Barrier Systems		
7.6.8	Emergency Voice Communications Refuge System (EVC)		
7.6.9	Red Emergency Telephones		
7.6.10	Data Cabling and Fibre		
7.6.11	Intercom Voice/Video Systems General		
7.7	Energy		
7.7.1	Photovoltaics (Where Required)		
7.7.2	Inverters		
7.7.3	Online monitoring		
7.7.4	Considerations		
7.7.5	Demand Side Response		
7.8	Commissioning		
7.9	Management of Isolation		
7.1	Appendix		
Chapter 8: IT Infrastructure			
8.1	Change Control		
8.2	Introduction		
8.3	Architectural Design		
8.4	Design co-ordination & sequencing		
8.5	Sequence		
8.5.1	Architectural Design		
8.5.2	Build		
8.6	UWE Comms Room Specification		
8.6.1	UWE Comms Room Specification		
8.6.2	Comms Rooms Ready Condition		
8.7	IT Cabling Infrastructure		
8.7.1	Standards		
8.7.2	UTP Termination and Containment		
8.7.3	Short Patching		
8.7.4	Fibre Termination and Containment		
8.7.5	UTP Outlet Labelling Convention		
8.7.6	Trace and Test		
8.7.7	Fixed IP Addresses		
8.8	Wi-Fi Infrastructure		
8.8.1	Overview		
8.8.2	Wi-Fi Design and Installation		
8.8.3	Steps to plan, deploy & verify a Wi-Fi installation		
8.8.4	Refurbishment Works		
8.8.5	Wi-Fi Access Point Placement (in order of preference)		
8.8.6	Building Fabric		
8.9	Construction Sites		
8.9.1	Training and Certification		
8.9.2	Personal Protection Equipment		
8.1	Security Infrastructure		
8.10.1	Access Control and Door Monitoring		
8.10.2	CCTV		
8.10.3	ANPR (Automatic Number Plate Recognition)		
8.10.4	Intruder Detection Systems (IDS)		
8.10.5	Panic Alarms		
Chapter 9: Landscaping, biodiversity and infrastructure			
9.1	Change Control		

9.2	Scope		
9.2.1	Standards		
9.2.2	General notes on landscape design and aesthetics		
9.3	Soft landscaping		
9.3.1	Biodiversity		
9.3.2	Temporary works impacting on soft landscaping		
9.3.3	Trees		
9.3.4	Memorials		
9.4	Hard Landscaping		
9.4.1	Pavements/Footways/Cycleways		
9.4.2	Specifications for 'private streets'		
9.4.3	Car Parking		
9.4.4	Motorcycle Parking		
9.4.5	Cycle Parking		
9.4.6	Barrier Controls		
9.4.7	Designing for deliveries, maintenance & emergencies		
9.4.8	Pollution prevention		
9.4.9	Underground Services		
9.4.10	Fire hydrants		
9.4.11	Emergency Evacuation Points		
9.4.12	Drain Covers		
9.5	Street Furniture		
9.5.1	External seating		
9.6	External Events		
9.7	Waste Handling & Storage Facilities		
9.8	Rainwater management		
Chapter 10: Audio-Visual (AV) infrastructure			
10.1	Change Control		
10.2	Introduction		
10.3	Design Process		
10.4	Cable Routes		
10.5	Containment		
10.5.1	Underfloor		
10.5.2	Riser		
10.5.3	In ceiling		
10.6	Room Type:		
10.6.1	Signage Screen		
10.6.2	Meeting Room		
10.6.3	Standard General Practice Teaching (GPT) Room.		
10.6.4	Lecture Theatre		
10.6.5	Technology Enhanced Active Learning (TEAL) Room.		
10.6.6	PC Lab		
10.6.7	Open Access Learning		
10.6.8	Specialist Spaces		
Chapter 11: Acoustic Standards			
11.1	Change Control		
11.2	Introduction		
11	3 Sound Insulation between Rooms - Airborne Sound between Rooms		
11.4	Airborne Sound Insulation between Rooms and Circulation Spaces		
11.5	Impact and Air Borne Sound Insulation of Floors		
11.6	Noise from Outside		
11.7	Room Acoustics		
11.8	Noise from Building Services		
11.9	Acoustic Design of Residential Accommodation		
Chapter 12: BMS Standards			
12.1	Change Control		
12.2	Building Management System (BMS) Engineering and Graphic Standards		
12.3	Input/Output module (I/O) Architecture		
12.4	Automation Server Naming Convention		
12.5	Enterprise Server Folders		
12.6	Automation Server Folders		
12.7	Graphics		
12.8	Software		
12.8.1	General		
12.8.2	Specific Requirements:		
12.8.3	Trend and Extended Logging:		
12.8.4	Support Tools:		
12.8.5	Software Protocols:
