1.0 Introduction

1.1 The University of the West of England, Bristol (UWE Bristol) Intellectual Property Policy sets out the rights of its staff, research and taught students in relation to their intellectual property and creative output. UWE Bristol is an enterprising and entrepreneurial university and aims to encourage and facilitate the development and protection, where appropriate, of any Intellectual Property (IP) created.

1.2 UWE Bristol commits to aligning its policies and procedures with national guidelines such as the UK Spin-Out Review recommendations and University Spin-out Investment Terms (USIT) guide, developed with sector partners, ensuring consistency, transparency and investor confidence.

1.3 This document sets out the policy in respect of the rights, responsibilities and procedures of the University and its staff and students in relation to intellectual property and material(s) created, to which UWE Bristol resources, including time, funds, facilities or expertise, have contributed.

1.4 This includes the ownership, development, commercialisation and exploitation of IP, and the sharing with staff or students any net revenue generated from IP.

1.5 UWE Bristol recognises that Intellectual Property generated by research and other work undertaken at the University is an important asset and wishes to encourage all staff and students to contribute to this activity. UWE Bristol also has the responsibility to identify, protect and manage its Intellectual Property effectively.

1.6 A Glossary of Terms has been provided at the end of this document as much of the language surrounding IP can benefit from clarification.

2.0 What is intellectual property (IP)?

2.1 UWE Bristol defines Intellectual Property as patents, utility models, rights to inventions, copyright and related rights, trademarks and service marks, trade names and domain names, rights in get-up and trade dress, rights to goodwill or to sue for passing off or unfair competition, plant variety rights, rights in designs, rights in computer software, database rights, semiconductor topography rights, rights in confidential information (including know how and trade secrets) and any other intellectual property rights, in each case whether registered or unregistered and including all applications (or rights to apply) for, and renewals or extensions of, such rights and all similar or equivalent rights or forms of protection which subsist or will subsist now or in the future in any part of the world. IP includes what might be termed 'Scholarly Materials' produced by employed staff in the normal course of their duties.

2.2 Certain forms of IP can be protected by registration, such as patents, trademarks and designs. Failure to register can have an impact on the ability of the IP owner to commercially exploit IP. The fact that IP may not have been registered does not, however, prevent the IP owner from asserting rights of ownership in relation to that IP including a right to commercially exploit. It should be noted, however, that unregistered

IP is much more difficult to defend.

3.0 Who owns IP?

3.1 Employed staff

3.1.1 Under intellectual property laws (including the Registered Designs Act 1949, the Patents Act 1977, Copyright, Designs and Patents Act 1988, and Copyright and Rights in Databases Regulations 1997) Intellectual Property created by employees in the course of their employment is owned by their employer. This means that IP created by UWE Bristol staff in the normal course of their duties is owned by the University. UWE Bristol staff includes all those employed by the University through a formal employment contract and includes academic, professional services and research staff.

3.1.2 All intellectual property created by individuals engaged under the **Casual Worker Agreement** shall be subject to the same ownership provisions as those applicable to employed staff.

3.1.3 Employees working at other institutions: UWE Bristol staff may have honorary academic appointments at other institutions. In such circumstances, before the UWE Bristol employee commences an honorary appointment, an agreement must be put in place, after consultation with UWE Bristol, between the university and the other institution in which should include terms establishing the ownership of any arising IP.

3.1.4 Employees working at Partner NHS Trusts: UWE Bristol employees with clinical duties may also hold honorary contracts of employment with the relevant NHS partner trust. In such circumstances the ownership of IP will remain with the University unless specific arrangements with partner trusts for IP identification, ownership and exploitation have been agreed.

3.1.5 Individuals with honorary, visiting or honorary status: The University awards honorary, visiting and emeritus status to some individuals. Such individuals are not formally employed by the University and will normally, therefore, own any IP they create. They may, however, be required under certain circumstances to transfer to the University any IP they create as if they were a university employee. This would include, for example, IP created jointly with a member of UWE Bristol staff, using UWE Bristol facilities or resources, or created during research or other activity for which the University is formally responsible. Where such an assignment is made, the individual may enter a revenue sharing agreement with the university using the same scheme that applies to university employees (see 3.1).

3.2 Students (undergraduates and post-graduate)

3.2.1 Students registered on a **taught degree programme** at UWE Bristol will normally own any IP they create. Where students generate IP in the course of their academic studies, they will normally own that IP in their own right. This includes all students registered on and undertaking a taught course at undergraduate or postgraduate level.

3.2.2 Exceptions to this may apply where, for example, the student:

- a) has specifically agreed otherwise in writing with the university;
- b) has a sponsored studentship under which the sponsor has a claim on the IP arising as part of the terms of the sponsorship;
- c) participates in a research programme or 'live' external company project where any arising IP is to be owned by the sponsor of the research or project;
- d) generates IP using UWE Bristol facilities and/or resources and is required to assign IP as a condition of use;
- e) generates IP jointly with an employee of UWE Bristol working in the course of his or her normal employment.

3.2.3 Where such an assignment is made, the student may enter a revenue sharing agreement with the university using the same scheme that applies to university employees (see 3.1). For the avoidance of doubt UWE Bristol will have no claim to any IP created by the student without use of UWE Bristol's facilities and/or resources. For questions or clarification, please email IPTeam@uwe.ac.uk

3.2.4 Students registered for **research-based degrees** (including PhD, ProfDoc and MPhil) own any IP generated solely by themselves in the course of their studies. However, research is typically carried out collaboratively with UWE Bristol staff, including their Director of Studies and other supervisors, and often requires the use of UWE facilities. IP from research projects is therefore typically created jointly by the student and University employees.

3.2.5 The University may therefore require that students undertaking research-based degrees assign any IP they create in the course of their studies to the University. Where such an assignment is made, the student may enter a revenue sharing agreement with the university using the same scheme that applies to university employees (see 3.1). Where the student's programme is funded by an external organisation the student may be required, if (but only if) there is a contractual arrangement with that organisation to this effect, to transfer ownership of IP to that organisation.

3.2.6 UWE is committed to supporting its students in the development and protection of their intellectual property. Where the University requests assignment of IP, this is to enable access to university equipment, resources, funding, legal support, networks, and commercialisation opportunities. Students are always recognised as the creators and are eligible to share the resulting income. UWE Bristol does not claim IP developed independently by students, or without significant use of UWE staff input, resources, or equipment.

3.3 Third parties

3.3.1 The University frequently enters into agreements with third parties which specify ownership of IP generated by university staff and students in research collaborations. In such cases IP may be owned by the University, the third party, or jointly depending on who creates the IP and what the terms of agreement are.

3.4 Scholarly works

3.4.1 UWE Bristol does not claim ownership of the copyright in Scholarly Works created by its staff. For the purposes of this Policy, Scholarly Works include, but are not limited to, journal articles, conference papers, student theses and dissertations, essays, poetry, works of art and academic textbooks.

It should be noted that while the copyright in Scholarly Works remains with the author(s), the University retains ownership of any other intellectual property rights that may exist within or arise from those works.

In recognition of this arrangement, and unless restricted by the requirements of a collaborator, publisher or external funder, authors grant UWE Bristol a non-exclusive licence to use Scholarly Works for the purposes of teaching, learning, and research. Authors may be required to assign their copyright to third parties (e.g. publishers or funders) to facilitate publication or meet funding conditions. Please refer to the UWE Research Publications Policy around open access practices and situations of co-authorship.

4.0 Disclosure and third-party IP

4.1 When undertaking work from which IP, covered by the Policy is generated or may be expected to be generated, all persons bound by the UWE Bristol IP Policy must:

- a) Complete a copy of the UWE Bristol [Innovation Disclosure Form](#) as soon as reasonably possible to notify the university of any innovation, invention, IP, exploitable technology or material created
- b) Keep the nature of and matters relating to IP and material confidential (through proper use of confidentiality agreements etc.) until the fact and manner of disclosure is assessed by UWE Bristol
- c) Assist with the protection and exploitation of IP developed, keep suitable records of creation, and co-operate fully with UWE Bristol and its agents (e.g. external patent agents and lawyers)
- d) Disclose to the Head of College (or nominee) or the Director of Research and External Engagement at the outset of the work, or as soon as they become aware of it - the ownership by a third party of any IP referred to or used for their work; or any pre-existing or independent IP which they themselves own which is proposed to be used by UWE Bristol
- e) Assist UWE Bristol in taking such further steps as UWE Bristol deems reasonably necessary to resolve any issue that needs to be addressed in connection with any third-party IP right that needs to be addressed whether before work commences or during the course of any project.

5.0 Commercialising IP

5.1 UWE Bristol Personnel (UWE Bristol employed staff or any person working under a contract for services with UWE Bristol) must inform UWE Bristol of any potential commercialisation of Intellectual Property owned by the University and any IP created using UWE Bristol facilities and/or resources.

5.2 Unless the University expressly authorises otherwise, commercialisation shall only take place under the direction of UWE Bristol and UWE Bristol shall determine whether it wishes to commercialise IP and if so, the steps that need to be taken.

5.3 If UWE Bristol decides that it does not wish to commercialise IP it may license or assign the IP to the creators where it can be shown to its reasonable satisfaction that assigning ownership or licensing will be on terms to be agreed and which are consistent with UWE Bristol's obligations as a charity and the use of public funds.

5.4 If the IP is commercialised by the creator, the University will typically be entitled to a 5 to 20 percent share of the equity, percentage is depending on how IP intensive the spin-out is, the market and opportunity and UWE Bristol will normally require an ongoing licence in perpetuity to continue to use the IP for research (including commercial research) and teaching purposes. UWE may also require a representative from the university to be on the board of the spin-out company (typically dependent on its share of the equity).

5.5 UWE Bristol Personnel may not, without written authority from the University, enter into any discussions, negotiations, arrangements or agreements with any person or organisation in relation to any IP which belongs to UWE Bristol.

5.6 The University may issue disclaimers of ownership of IP in appropriate cases and agree that the IP can be owned by the creators, for example for scholarly works.

6.0 Setting up a business or company for the exploitation of IP

6.1 UWE Bristol staff, students and/or other individuals covered by the IP Policy may wish to set up a business, for example by operating as a sole trader or forming a partnership, a limited company or other corporate structure (the 'New Entity'), to exploit IP covered by this IP Policy. Before doing so they must seek and secure permission from the Board of Governors on the recommendation of the Vice Chancellor.

6.2 Permission will usually require that a viable business plan and relevant agreements and equity positions have been developed, the necessary funding, for example sources of investment have been identified and approved and the form of New Entity for exploitation has been determined.

6.3 Permission from the Vice Chancellor or representative acting on their behalf and

the relevant Head of the College involved are needed for any UWE Bristol staff to take up a Directorship of a company or to take up a partnership position that will involve University investment in the form of resources or assets (whether this be payment of money or payment in kind).

6.4 UWE Bristol will normally be a shareholder (or equivalent) in any New Entity which involves UWE Bristol staff, resources or assets, or where UWE Bristol has previously provided funding to the project.

6.5 UWE Bristol will, normally, license on suitable terms any IP needed by the New Entity which may be either exclusive or non-exclusive.

6.6 UWE Bristol may choose to negotiate on its own behalf and/or on behalf of university staff with stakeholders (for example funding bodies, joint owners of IP with UWE Bristol, any present or previous sponsors of work at or with UWE Bristol) for any IP or information to which the New Entity needs access.

6.7 University staff or students involved in a New Entity need to seek and fund their own independent financial and legal advice (and in particular tax advice) in relation to the formation of a business or company under this Policy.

6.8 Any New Entity must take out its own insurance for risks including but not limited to: public liability insurance, patent infringement insurance, professional indemnity insurance, employer's liability insurance, cyber insurance, directors and officer's insurance, buildings and contents insurance and product liability insurance, as appropriate.

6.9 The University will implement streamlined and transparent approval processes for the formation of new entities to reduce delays in company formation and investment.

7.0 Revenue sharing of proceeds from the exploitation of IP

7.1 Typical arrangements

7.1.1 UWE Bristol will typically take no more than 20% founding equity (pre-investment) in new entities involving University IP or resources, with flexibility to reduce this share to enable external investment, executive recruitment, and employee stock option pools. Equity arrangements will be clearly documented in agreements to provide clarity and protect founder interests.

7.1.2 Licenses granted to new entities will include terms that are fair and enable business growth, including: Patent assignment triggers to protect University IP if the venture fails to progress, royalty buy-out options to provide financial flexibility, and

sublicensing rights sufficient to allow new entities to execute their business models effectively.

7.1.3 UWE Bristol will share any revenue from the exploitation of IP in which it has an interest with the relevant UWE Bristol staff, students or other individuals. UWE Bristol may have certain obligations or costs to meet before any revenue is distributed. The University may therefore deduct reasonable costs from gross revenue prior to the calculation of revenue shares and distribution where these costs are not externally funded or otherwise recoverable. These costs may include:

- a) Royalties due to third parties including funders;
- b) Costs and professional fees associated with the protection, maintenance, renewal and prosecution of the IP;
- c) Costs associated with undertaking due diligence on the IP or materials;
- d) Costs and professional fees associated with the defense of the IP;
- e) Legal costs and professional fees associated with negotiation, legal agreements and advice;
- f) Costs associated with marketing the IP (including travel costs); and
- g) The costs of any development work that is not externally funded or recoverable by UWE Bristol;
- h) Any tax payable in the UK or overseas.
- i) Any interest payable due under any loan between UWE Bristol and the New Entity
- j) Any capital payment due under any loan between UWE Bristol and the New Entity
- k) Any other payment due to UWE Bristol under the terms of any Shareholder agreement other than a dividend.

7.1.5 The sharing of 'Net Revenues' (calculated as set out above) from the exploitation of IP will normally be as follows:

- a) UWE Bristol staff share – 50% (to be apportioned as described below)
- b) College Share – 25%
- c) University Share – 25%

7.2 Exceptions

7.2.1 UWE Bristol will not pay a royalty to employees for fundamental core activities, such as research undertaken within the normal course of duties or relating to teaching or CPD activities.

7.2.2 UWE Bristol will not pay a royalty on monies received from a third party by UWE Bristol to undertake research, consultancy or further development work.

7.2.3 UWE Bristol will not pay a royalty from monies received from the sale of shares associated with the exploitation of IP and this will be confirmed in the shareholders' agreement for any New Entity - it is expected that inventors/creators would have

shares themselves in the New Entity.

7.2.4 UWE Bristol will normally wait until the amount of royalty to be distributed is greater than £100 (one hundred pounds sterling) in any one lot before undertaking royalty distribution.

7.2.5 Where IP is generated by more than one inventor or creator, they are each responsible for informing UWE Bristol of the proportion of their individual contributions to its generation.

7.2.6 For the purposes of distribution of inventor/creators' shares in respect of Net Revenues received from exploitation of IP and material generated jointly it shall be the responsibility of the inventors/creators to agree their relative apportionment and to inform UWE Bristol in writing by completion of the "INTELLECTUAL PROPERTY: MATERIAL INCOME DISTRIBUTION FORM". This document is an important part of the due diligence process and should be completed prior to the exploitation of any IP or materials.

9.0 Glossary of terms

9.1 To create	Create, devise, design, invent, discover, be the author of or otherwise originate any Intellectual Property and The Creator .
9.2 copyright	Broadly speaking copyright is a right to prevent various forms of copying and/or exploitation without the owner's consent. It protects the expression of an idea and not the idea itself. Amongst other forms of expression, copyright protects written text, drawings and other works of art, photographs, music, dramatic works, sound recordings, films and computer programmes.
9.3 due diligence	IP due diligence aims to establish who is the legal owner of the IP and to also establish who has rights over it. Due diligence helps to identify and resolve any potential obstacles to the exploitation of the IP in question.
9.4 Intellectual Property or IP	Patents, utility models, rights to inventions, copyright and related rights, trademarks and service marks, trade names and domain names, rights in get-up and trade dress, rights to goodwill or to sue for passing off or unfair competition, plant variety rights, rights in designs, rights in computer software, database rights, semiconductor topography rights, rights in confidential information (including know how and trade secrets) and any other intellectual property rights, in each case whether registered or unregistered and including all applications (or rights to apply) for, and renewals or extensions of, such rights and all similar or equivalent rights or forms of protection which subsist or will subsist now or in the future in any part of the world.
9.5 Background IP	Intellectual Property that is already in existence prior to the commencement of a project or collaboration, or that is generated independently of the project. Background IP is not created in the course of the specific collaborative work but may be used or

	needed to carry out the project. Ownership of Background IP remains with the original owner, unless otherwise agreed in writing.
9.6 Foreground IP	Intellectual Property that is created, developed, or generated during and specifically as a result of a particular project or collaboration. Foreground IP is typically owned in accordance with the contractual terms governing the project and may be subject to rights and obligations concerning its use, protection, and exploitation.
9.7 know how	Information or expertise which is substantial, valuable and secret. It is not capable of registration and the only way of protecting it is to keep it confidential. It may be disclosed to others in confidence, preferably under an agreement such as a confidentiality agreement which sets out terms of use of the know-how and which puts the party receiving the know how under an obligation to keep the information confidential.
9.8 patents	A patent is an exclusive right granted for an invention which is new and offers a solution to a problem. A granted patent allows the owner to prevent others from using the product or process which has been patented (including making, selling, importing and exporting in a particular territory). The relevant protection is territorial, meaning the patent is only enforceable in the country or region where it has been granted, and it typically lasts for up to 20 years from the filing date, provided renewal fees are paid.
9.9 Trademark	A trade mark (often referred to as a brand name) is a distinctive sign which identifies certain goods or services as those produced or provided by a particular person or enterprise. In the UK, a trademark may be unregistered or an application may be made to register the mark at the UK Intellectual Property Office ('IPO'). A trade mark is registered for defined classes of goods and/or services. A registered trade mark offers more protection than an unregistered trade

	mark and can be easier to defend if it is found that someone else is using the mark for the same or similar goods or services to those for which it is registered. The period of protection for a trade mark varies, but can generally be renewed indefinitely, by payment of renewal fees to the UK IPO every ten years.
9.10 Commercialise	Realise commercial or financial benefit through the exploitation of Intellectual Property.
9.11 Scholarly Materials	Non-commercial materials of a scholarly nature created by UWE Bristol Staff in the Course of their employment and potentially includes: • academic journal articles; • conference papers and related presentations; • notes created only for the Employee's own personal use; • theses and dissertations; • popular non-fiction, novels and poems; • works of fine art, hard copy textbooks (unless such textbooks were developed using University administered funds paid specifically to support textbook development.
9.12 Formal Staff	Individuals employed by UWE Bristol under a contract of employment, including academic, research, and professional services staff. This term excludes honorary, visiting, or emeritus staff unless otherwise agreed in writing.
9.13 Normal course of duties	Activities carried out by a member of staff as part of their expected responsibilities under their employment contract. This includes teaching, research, scholarship, supervision, administrative duties, and any other tasks reasonably associated with their role at UWE Bristol.

Review, approval and publication

This document should be reviewed by the Impact and Commercialisation Team every two years. The Impact and Commercialisation Team will consult with Legal and Contracts to review any suggested amendments before seeking approval from the University Executive Committee.
