UWE Bristol | University of the West of England

Abaqus

Current version: 2021

On your own device, launch via Cloudpaging Player
Follow the steps below

Abaqus will launch using Cloudpaging Player. and requires Pulse Secure VPN to be connected.
Pulse Secure VPN install instructions: go.uwe.ac.uk/installVPN

Step 1
Go to https://appsanywhere.uwe.ac.uk, log in, and look for Abaqus, click **Launch** to activate Cloudpaging Player, make sure you have Pulse Secure is installed and connected.

Step 2
Cloudpaging Player will advise 'Abaqus was added to your list of applications '. The player will show 'Pre-fetching', 'Activating', then 'Virtualising' up to 100%.

Step 3
The app will open, and you can start work, while Cloud Paging Player continues 'Paging the remainder' up to 100%, then shows as 'Running'.

On a UWE computer, Abaqus is installed locally.
Launch via AppsAnywhere.

Step 1
Go to https://appsanywhere.uwe.ac.uk, and look for Abaqus, click **Launch** to load the local installation.
