Ansys

Current version: 2021 R1

On your own device, launch via Cloudpaging Player
Follow the steps below

Ansys will launch using Cloudpaging Player. and requires Pulse Secure VPN to be connected.
Pulse Secure VPN install instructions: go.uwe.ac.uk/installVPN

Step 1
Once Pulse Secure VPN is installed and connected, go to https://appsanywhere.uwe.ac.uk, log in, and look for Ansys 2021 R1.
From the Launch screen, under Pulse Secure, select 'I have it', then select '**Launch app**' to activate Cloudpaging Player.
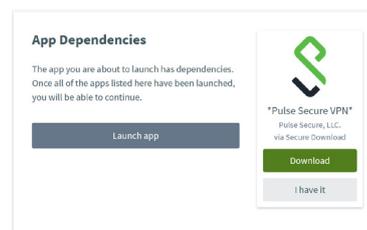

Step 2
Cloudpaging Player will advise 'Ansys 2021 R1' was added to your list of applications '. The player will show 'Pre-fetching', and may take a while to bring up while it n 'Virtualising' up to 100%.

Step 3
Note: If the software launches and you see an error screen, close Ansys and wait for the cloudpaging to complete, Ansys will be ready to launch when its status is Ready in Cloudpaging Player.

On a UWE computer, Ansys is installed locally.
Launch via AppsAnywhere.

Step 1
Go to https://appsanywhere.uwe.ac.uk, and look for Ansys, click **Launch** to load the local installation.
