# MATLAB

## Current version:  R2021a

**On your own device,** launch via Cloudpaging Player
**Follow the steps below**

**MATLAB will launch using Cloudpaging Player. and requires Pulse Secure VPN to be connected.**
**Pulse Secure VPN install instructions:** go.uwe.ac.uk/installVPN

**Step 1**

Go to https://appsanywhere.uwe.ac.uk, log in, and look for MATLAB, click **Launch** to activate Cloudpaging Player, make sure you have Pulse Secure is installed and connected.

**Step 2**

Cloudpaging Player will advise 'MATLAB was added to your list of applications '. The player will show 'Pre-fetching', 'Activating', then 'Virtualising' up to 100%.

**Step 3**

The app will open, and you can start work, while Cloud Paging Player continues 'Paging the remainder' up to 100%, then shows as 'Running'.

**On a UWE computer, MATLAB is installed locally.**
**Launch via AppsAnywhere.**

**Step 1**

Go to https://appsanywhere.uwe.ac.uk, and look for MATLAB, click **Launch** to load the local installation.
