

# NI Multisim

Current version: 14.2

**Install on your own device:**  
Download through AppsAnywhere  
Follow the steps below

**On a UWE computer:**  
Launch from Windows  
Steps on page 2

**NI Multisim is available via a Secure Download.**  
Please note, the download needs a sturdy connection, and may take some time.

## Step 1

Go to <https://appsanywhere.uwe.ac.uk>, log in, and look for NI Multisim 14.2, click Download to get the Multisim installer.

## Step 2

Once downloaded, double click [ni-cds-educational\\_14.2.0\\_offline.iso](#). Double click 'Install.exe', and click Yes to the 'NI Package Manager PreInstall' admin prompt.

## Step 3

Click 'Next', leaving the default options as they are.

## Step 4

Accept any license agreements if prompted, and click 'Next'. Click 'Next' once more to begin the installation. Click 'Ok' to any further prompts throughout the installation.

## Activation of NI Multisim on your computer

## Step 1

Once installed, you should get a prompt to Activate the software, if not launch NI Multisim 14.2 from the Start menu

## Step 2

Click 'Log in to activate'. If you don't have an account already, click 'Create Account'. Use your UWE Bristol email address to create an account, select your Role as 'Student'. Set the company as 'University of the West of England' and let it autocomplete the address fields. You will be sent a verification email, which you will need to access to complete the account activation.

## Step 3

Go back to the Activate software window and click on "Log in to activate", sign in with your newly created account.

## Step 4

Click on the drop-down menu for "Check my account for licences" and select "Enter a serial number".

## Step 5

When prompted, use the serial number from the AppsAnywhere portal for Multisim (found under More info) on the item for Multisim.

**Please note**, if you have previously installed other NI software, you may need to scroll to find Multisim.

## Step 6

Click 'Activate', and you should get a prompt to say that activation was successful and then click 'Finish'.

Reboot your machine and you should be ready to use LabVIEW.

## Launch NI Multisim 14.2 on a UWE computer

## Step 1

NI Multisim 14.2 is installed locally on the PC's in the Engineering building.

Search for "NI Multisim 14.2" in the Windows search bar, and select Open to launch.

**This app is not available for Mac.** If you intend to install NI software on a Mac using Bootcamp, there is a known technical issue during the activation step. In this case, please contact [technical.support@ni.com](mailto:technical.support@ni.com) and they will be able to help generate a unique activation for you.
